

Opportunity for Students of Mercer County Community College to Attend University of the Sciences

University of the Sciences (USciences) and Mercer County Community College (MCCC) have joined in an articulation agreement to facilitate the transition of MCCC students admitted into specified Associate degree programs at MCCC into pre-identified B.S. programs at USciences.

Under this agreement, MCCC students who graduate with specified Associate of Science (A.S.) and meet the GPA required by a specific USciences B.S. program may transfer to USciences with junior status, so long as they meet all USciences admissions requirements and submit a completed Letter of Intent Form.

Basic Terms of the Agreement:

- ◆ Students are required to complete the courses encompassed in their associate's degree from MCCC within 3 years immediately preceding matriculation to USciences; students taking more than 3 years can still transfer under this agreement subject to USciences departmental approval.
- ◆ A maximum of 90 credits will transfer to USciences.
- ◆ Students must achieve the minimum cumulative GPA required for admission into a specific USciences B.S. program.
- ◆ Students must earn a minimum grade of "C" to transfer a course to USciences; however a minimum grade of "B" for specific core courses may be required for admission into specific USciences BS programs.

For students who have satisfied the conditions of this agreement, USciences will:

- ◆ Waive the application fee.
- ◆ Award academic merit scholarships to MCCC students who graduate with a 3.0 GPA or higher.
- ◆ Provide MCCC students with opportunities to meet with USciences representatives and faculty for assistance in transferring to the chosen USciences BS program
- ◆ Receive invitations to open houses and relevant university and departmental events and programs.

Additional questions can be directed to the Transfer Admission Office via email: transfer@usciences.edu or via phone: 888-996-8747.
