Criterion 2/3/4.11 Continuous Assessment and Improvement

Each program MUST have an assessment process that includes a written plan with documented results. This process MUST incorporate relevant evidence used to regularly assess the program. The results of the assessment MUST be used to effect continuous improvement of the program.

2/3/4.11.3 Public Information. Each AABI-accredited program MUST provide publicly available data on student achievement and information about how the program uses assessment data to advance academic quality, as required by the Council on Higher Education Accreditation (CHEA).

To satisfy these requirements, accredited programs MUST provide the following, publicly available information, and this information MUST be updated at least annually.

The report MUST include the revision date, and MUST include:
1. Student retention and graduation rates, including the percentage of students enrolled one year after starting the program, the number of degrees granted each year, and percentage of associate degree students graduating within three (3) years.
2. The employment or continuing education rates and types of employment (aviation, aviation-related, other, or unknown) within one (1) year of graduation.
3. A copy of the program's comprehensive assessment plan, as explained in section 2/3/4.11.
