## <u>System Tune-Up - Installing CutePDF</u> <u>Writer</u>

## What is CutePDF Writer?

CutePDF Writer is an application that acts as a printer inside your computer and allows you to save your documents in a PDF format.

## Why do I need it?

By saving documents in PDF format, we guarantee that the text cannot be changed, and we also provide the information in a format that can be read on any computer that has the Adobe Reader installed. *(For instructions on how to install Adobe Reader, click here.)* 

The CutePDF Writer gives instructors the ability to create printer-friendly versions of lectures, syllabi, and other course materials.
